	Approved For Release 2003/05/15 CIA-RDP78B04747A003200010033-7 SIF IEC
	1. The deliverable items on this contract were:
	a. Two (2) each Gumma I Panoramic Rectifiers b. Ten (10) capies of the Operations and Maintenance Manual
	c. Ten (10) copies of the Final Report.
	2. The above items were delivered and accepted as follows:
	a. The last prototype rectifier was accepted 29 October 1965.
į	b. Ten (10) copies of the Operation and Maintenance Manual were received and accepted during July 1965. c. Ten (10) copies of the Final Report were received and accepted during February 1966.
,.	
25X1 E	3. In accordance with the Development Plan, both of the rectifiers were delivered to, and are in the custody of the Department of the Army, Corps of Engineers. Army Map Service. The Army Map Service The Army Map Service. The Army Map Service The Army Map Servic
n	4. Both the Final Report and the Acceptance Report carry a security classification that is higher than that normally handled by the Logistics Branch of NPIC, therefore these documents have not been forwarded to that office. They are available in the files of P&DS/DB for review. Should Logistics Branch desire a copy of the Acceptance Report, it is suggested they contact the Army Map ervice and have a sanitized copy of the report made for their files.
25 1 25 25 25 25 25 25 25 25 25 25 25 25 25	5. This contract has been behind schedule for much of its uration and there have been three overruns: one in April 1963 for another in April 1965 for and the last in May 1964, equested an amount in the neighborhood of This last verrun request resulted in a re-negotiation in which a final ontract figure of as a greed upon for the two prototypes, and represents a total cost increase of over the initial ontract estimate of The final contract price also
25\$1 1	obligated for the initial study under Task Order # 5.
25K1 cc	6. Notwithstanding the questionable performance on this entract as shown by the delays and overruns in paragraph 4 above, t is felt that has done a very commendable job on a very explex requirement. The difficulties which occurred have been due a development requirements being far more complex and requiring reater precision than had been expected.
	Development Branch, Pads

On 12 June 1964 a meeting concerning the rectifier was held at AMS. Those present were:	
	25X
The pro & con of the foulup on the rectifier lens design was discussed. The conclusion was that it involved a complete lens redesign which was two weeks underway at that time. The representatives reemphasized their confidence that a lens could be designed to meet the contract specifications.	25X
The contract will be renegotiated on a Fixed Price basis. will assume most of the cost of lens design and fabrication as it was a result of "their mistakes".	25X
This will delay delivery another seven months.	
Actual cost of the renegotiated contract has not been determined but will be in the neighborhood of A proposal outlining remaining effort was due the week of 29 June. Army will again provide	25X

funds.

Excluded from automatic downgrading and declassification

(12-36)

Approved For Release 2003/05/15 : CIA-RDP78B04747A003200010033-7

25X1

All work has ceased on the Camea I relifiers pending resolution of
#3 overrun; this overrun is in the amount of
It has been discovered that the especially designed lens for this
recitifier although very high in siresolution capability suffers from
intolerable distortions. It is claimed by the engineers that a
breakdown in communicating with the optical design and fabricating
department during the design stage is the resultant cause for the
inferior leas.
In a meeting of 1 June with
(GIMRADA), it was decided to re-negotiate the contract on a
fixed price basis for the amount of for the completion of the
two rectifiers to include a corrected design and fabrication of lens.
Army will furnish the required funds.
This will entail further delay of approximately five (5) months
after contract.

AME (DE PA), and I visited Project enginess and Engineer, respectively, of to sevice progress on the rectifier.	
Both and agreek were delighted with the instrument from the technical viewpoint. It has been kept simple in physical concept. This will affect maximum and efficiency in quality of rectified product and ease of operation of the instrument. The agreement technicians are to be conscided to wold will be ready for tecting in about two weeks.	Ť.
- The every table. About a servicularly the type of everyon, leaves nothing but a manny table. About a feeting the type of everyon, leaves nothing but a manny table. About example overnoon, seven, of course, have rises, but an added 10% material handling fee, made representative to October of last year, is difficult to diges.	

AMO will one by the total overrun funding.

(12-36)

A memo to the Contracting Officer has been sent recently releasing funds for long lead time item procument.

Finalization of work statement is emminent.

Presently there appears to be about more funds required to get the desired instrument. NPIC will be required to furnish only half of the above amount; the other half being funded by Army.
